11. Summary of the findings of the thesis:

Firstly, the researcher has clarified the rationale of financing activities in import-export at PVcomBank. In which the researcher has given the assessment criteria for the financing activities at Commercial Bank.

Secondly, through analyzing the actual situation of the financing activities in import-export at PVcomBank, the researcher has implemented to evaluate the financing activities in import-export at Bank. The result of research show that beside the achievements, there have some limitations in the financing activities in import-export at Bank, such as: the financing activities are poor, the customer structure, who sponsors for import-export are unreasonable, the quality of services are not good, the structures of short loans in general and financing activities in particular are not well.

Thirdly, from the limitations and the remaining reasons, the researcher has proposed some solutions to improve and develop the financing activities in import-export at PVcomBank, such as: standardizing sponsor products for import-export for small business, promote the mobilization of capital, especially foreign currency
capital serving for the financing activities in import-export, diversifying the forms of export-import financing, improving the quality of evaluation work ...
